24HR SERVICE

Ketek Power Services Technicians have a vast array of knowledge when it comes to the inner workings of electrical systems found throughout the industry. Our electricians, instrumentation technicians and millwrights are qualified through external and internal sources to guarantee they are at the top of the industry when it comes to safety, quality and any additional applicable standards to the projects that they are assigned.

Ketek Power Services has the ability to provide that support for as little or as much of your project as needed. The range of service can include almost any task, including: project management, testing, calibration, installation, replacement, troubleshooting and custom manufacturing.

INSTALLATION AND COMMISSIONING

Our Installation and Commissioning services will optimize your cost of ownership.

SERVICE AND MAINTENANCE

Ketek will operate and maintain all your permanent and temporary power needs.
