

SmartTEK

Save fuel. Save time. Save money!

Now, in real time and from the comfort of your office or the convenience of your phone, you can control your equipment and monitor its performance. Want it to turn on and off depending on ambient light? No problem. Need fuel or maintenance? You'll know.

With Ketek's SmartTEK suite of technologies, you can know all that and more.

Knowledge is power, and that power will let you increase operational efficiencies and reduce cost:

- ✓ You'll need fewer trips to service and fuel equipment.
- ✓ You'll have more efficient employees and less downtime.

Benefits

Less maintenance, fewer trips to refuel, lower fuel consumption, reduced manpower needs and GHG emissions and, ultimately, lower costs

The Brains of the System

With a Programmable Logic Controller (PLC), we can program SmartTEK to perform just about any way you want.

Here are a few of the more popular uses

-  PHOTOCELL ON/OFF
-  PRESSURE READING
- auto control
- monitor
-  FUEL LEVELS
-  TANK LEVELS
- auto fill
- auto drain
-  FLOW MONITORING
-  EXTERIOR AND INTERIOR TEMPERATURES

Ask us what other help with remote operation we can provide.

1-855-447-5050, ketek.ca

Features

- Monitor multiple pieces of equipment, from your computer or phone
- Lower operating costs
- Increase efficiency
- Reduce environmental footprint
- Control equipment with two-way communication
